1 TYLER HENNING: I'm Tyler Henning, H-e-n-n-i-n-g. I want to talk about the nuclear waste, about the guy who's going to put the nuclear waste in our mountain, I mean Yucca Mountain. I think that people are going to die because what happens if you put it in our pool?

And so they're putting the nuclear waste in the pool, and so they're using the robotic arms and they're wasting the energy. So they put it in Yucca Mountain or some other mountain, and someone digs it up and they die. I don't believe that.
